

**Action Taken Report 2020-21**

In response to the feedback received, the college administration has implemented various initiatives to address the raised concerns:

- The curriculum has been redesigned, incorporating a mix of student seminars, technical teaching practices, and ICT-based instruction to foster individual growth.
- The campus now boasts high-speed internet connectivity, smart classrooms, and a technologically equipped digital seminar hall to facilitate interactive learning.
- To enhance the overall environment, well-kept gardens, parks, and green spaces have been created. Outdoor seating areas are provided for relaxation and study.
- Spacious halls with audio-visual facilities have been established for conferences, seminars, and guest lectures, along with facilities to host academic and professional events.
- Regular maintenance schedules are in place to ensure all facilities remain in good condition. Prompt responses to repair requests and necessary facility upgrades are promptly carried out.
